

Your proactive AI that acts before you even ask

LIVE DEMO WALKTHROUGH

Meet Alex — student, engineer, and founder

Managing a CS degree, a part-time dev job, and an early-stage startup simultaneously.

8:07 AM · OPERATOR WAKES

Scans 14 new emails, 3 calendar events, 2 external web signals from overnight

↳ **Cross-encoder scores 19 signals**

8:07 AM · BRIEF DELIVERED

● **Pitch deck** due 9am tomorrow — 3 slides missing

● **Company standup** in 2h — no update sent

● **YC batch** opens in 6 days — start application

8:08 AM · ALEX'S RESULT

Opens laptop already knowing exactly what to do. Zero inbox triage. Zero calendar-hunting.

↳ **90 minutes reclaimed**

No prompt. No context-switching. Just clarity — every single morning.

THE SOLUTION

Oppy acts before you ask.

A continuously running AI agent that scans your signals, scores urgency, and delivers a concise action brief — so you always know what to do next.

Proactive Scanning

Continuously monitors emails, calendar, and web context

Urgency Scoring

HuggingFace cross-encoder ranks what matters now

Action Brief

Delivers concrete next steps, zero noise

OPERATOR · LIVE BRIEF

Good morning, Alex. Here's what needs your attention:

URGENT

Startup pitch deck due in 18h → Draft slides 4–7

MODERATE

Prof. Chen replied re: extension → Confirm before 5pm

LOW

YC application window opens → Prepare draft this week

TECH STACK

Built on proven, open infrastructure

Every component is production-grade, open source, and purpose-chosen for reliability and speed.

CORE INTELLIGENCE

HuggingFace cross-encoder

Semantic urgency scoring — not keyword matching

Gmail API

Real-time email signal ingestion

Google Calendar

Deadline and event proximity scoring

Web Context

External signals: YC deadlines, market news

FastAPI + Python

Async pipeline, low-latency brief gen

OAuth 2.0

Secure, user-scoped data access

HuggingFace

Cross-encoder reranker model

HOW IT WORKS

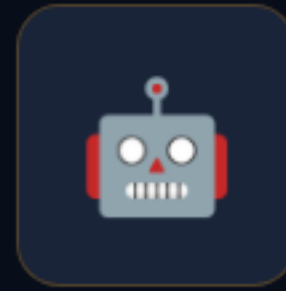

Four-stage intelligence loop

Running continuously in the background — no prompt required.

Scan

Polls Gmail, Google Calendar, and live web context on every cycle

Score

HuggingFace cross-encoder ranks every signal by urgency and relevance

Decide

Deterministic initiative rules trigger on silence, deadline risk, or external signal

Brief

Generates a prioritized action brief with concrete next steps, delivered to you

Key design choice: Oppy uses deterministic rules — not stochastic guessing — to decide when to surface a brief. This makes behavior predictable, auditable, and trustworthy.

Stop reacting. Start leading.

Oppy gives you back the one resource you can never get more of — your focused attention. We're looking for early users and collaborators.

oppy.ai/operator

WHAT WE BUILT

- ✓ Proactive multi-source signal scanner
- ✓ HuggingFace cross-encoder urgency ranking
- ✓ Deterministic initiative rule engine
- ✓ Concise action brief generator

WHAT'S NEXT

-  Slack + Notion + GitHub connectors
-  Mobile push notifications
-  Autonomous task delegation
